REVENUES

Where the Money Comes From

The Primary Government consists of all governmental activities that make up the Island's Executive Branch. GovGuam as a whole provides government-wide statements which report information using accounting methods similar to those used by private-sector companies. While the government-wide financial statements focus on the primary government and component units statement of net position and statement of activities, the fund financial statements provide detailed information about GovGuam's most significant funds and not GovGuam as a whole.

GovGuam's primary government and components units have two major sources of program revenues which are comprised of federal grants and general revenues. Additional revenues are derived from charges to customers or applicants for goods, services, or privileges. These charges are accumulated and available for use for each corresponding program function.

General revenues come from taxes, investments and other fees that are not earmarked for specific programs. Although some governmental activities have their corresponding program revenues, the majority of governmental activities are funded through general revenues.

Throughout fiscal year 2020, there was an accumulation of \$990.3 million in program revenues. At the forefront of program revenues is Public Welfare with \$392,509,688 million, increasing 100% from prior year. In second place is Public Health increasing \$36.9 million, or 13.32% from fiscal year 2019. Economic Development increased \$13.5 million, or 103.9%, from fiscal year 2019. Program revenues for Public Education, General Government, Protection of Life & Property, Individual & Collective Rights and Community Services increased in fiscal year 2020 for a combined total of \$29.7 million compared to fiscal year 2019.
